

CDC Parachute

Hook	TMC2487 12 14 Kamasan B100 12 14
Thread	Black 08
Body	CDC bright (white, light grey)
Parachute	CDC white
Thorax	CDC olive
Rib	Copper wire fine

1. Tie in the thread to the middle of the hook shank

2. Tie in the copper wire
3. Wind the thread into the curvature of the hook

4. Tie in the bright CDC feather with the tip of the feather
5. Wind back the thread to the middle of the hook shank

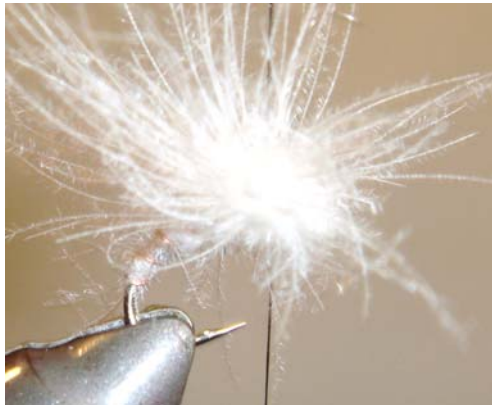

6. Using a hackle clamp, wind the CDC Feather to the middle of the hook shank
7. Tie off the feather and cut off the excess

8. Rib the rear body with the copper wire

9. Get the fibers of a white CDC feather and insert them in a loop
10. With your fingernail push the fibers against the hook shank
11. Now start twisting the loop

12. Fix this indicator on top of the hook shank by tying off the thread of the loop

13. Cut the indicator into the correct shape

14. Insert the fibers of the olive CDC into the split thread
15. Twist the thread
16. Tie a parachute around the white post

17. Tie a neat head
18. Whipfinish
19. Cut off thread
