

## Guinea Fowl sedge

Hook	TMC100 12 14
Thread	Black 08
Body	Seals fur black
Wing	Guinea Fowl feather
Hackle	Cock feather black
Rib	Copper wire fine

1. Tie in the thread to the middle of the hook shank

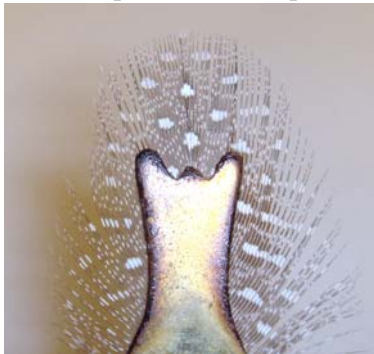

2. Tie in the copper wire  
3. Wind the thread up to the curvature of the hook

4. Dub the thread with black seals fur  
5. Wind the body of the fly

6. Rib the body with the copper wire

7. Center the Guinea Fowl feather in the burning iron

8. Using a lighter burn off the excess

9. Varnish the feather with "nail repair"  
 Alternative: If you do not possess wing  
 burning irons, varnish the feather and cut in  
 shape after drying of the varnish

10. Shape the wing by folding it over  
 a dubbing needle  
 11. Tie in the wing

12. At the eye of the hook, tie in the cock  
 feather

13. Wind the hackle  
 14. Tie off the hackle at the wing  
 15. bring back the thread to the eye  
 of the hook winding it through  
 the hackle

16. Wind the head  
 17. Whipfinish  
 18. Cut off thread  
 19. Apply black cement to the head
