

Caddis Puppa

| | |
|--------|---|
| Hook | TMC2487 10 12 Kamasan B100 10 12 JMC CA40 10 12 |
| Thread | Schwarz 06 08 |
| Body | Leather strip 3-4mm 2 Ostrich Herls white |
| Wing | CDC light brown or olive Hare mask brown |

1. Wind 7-8 turns of lead around the hook shank

2. Wind the thread from the eye of the hook into the curvature of the hook

3. Tie in the long Ostrich herls on each side of the hook shank

4. Tie in the leather strip at the lead wire and fix it down into the curvature of the hook

5. wind the leather strip for half a turn until it points to you
6. Wind the Ostrich herl - which is on the hook side facing you - around the leather strip (counterclockwise) until its tip points back to the hook curvature
7. wind the leather strip for half a turn until it points away from you (this secures the Ostrich herl on your side)
8. On the hook side which is opposite to you, we wrap the second Ostrich herl around the leather strip (clockwise) until its tip points back to the hook curvature
9. Repeat steps 5 to 8 up to 5mm in front of the eye of the hook.
10. Secure the leather strip and cut off the excess (leather and Ostrich herls)

11. Use a black permanent marker to color the back of the nymph.

12. Insert the CDC fibers into a dubbing loop or split thread
13. twist
14. wrap around head to form a kind of hackle

15. Insert the hare's ear hair into a dubbing loop or split thread
16. twist
17. wrap around head to form a kind of hackle
18. wind head
19. whipfinnish
20. Vernis
