

Green Pike Streamer

Hook	Pike hook 1/0
Thread	Black Kevlar
Tail	Fluo green Zonker strip
Body	Fluo green Zonker strip
Hackle	Red Marabou
plus	Bronze Chrystalflash Stick on eyes Epoxy 5min

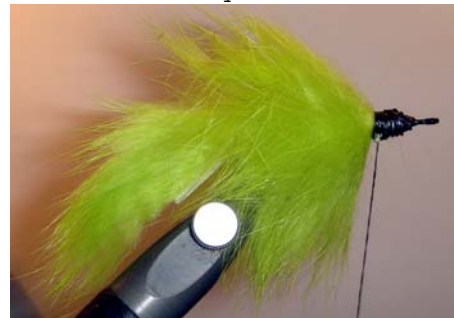

1. Wrap lead wire around the hook shank as shown in the picture

2. Tie-in the thread
3. Wrap around the lead wire to form a uniform body

4. Tie in the zonker strip at the curvature of the hook such that the tail will have hook shank length

5. Wind tying thread up to the head of the fly
6. Wrap the remaining zonker strip around the body making sure to pull back the hair after each turn

7. Tie-in a few strands of Chrystal flash

8. Twist Marabou feather tips in a loop
9. Wind front hackle

10. Wind head
11. Whipfinnish
12. Cut off tying thread

13. Use a rubber band to pull back the feather tips
14. Varnish head with black head cement (several layers may be needed)

15. Add stick-on eyes to the head

16. Cover head and eyes with 5 minutes epoxy glue

17. Stick the fly to your rotating dryer
18. Remove rubber band when completely dry
