

Jang's Black Sedgehog

Hook:	TMC 200R 12 14
Thread:	08 black
Tail 1:	yellow neon floss
Tail 2:	Goldpheasant Tippetts
Body:	Hare Dubbing black
Wings:	Deerhair black
Ribbing:	Silver wire fine
Hackle 1:	Black cock
Hackle 2:	Partridge feather tips

1. Tie-in the thread at a short distance from the eye of the hook

2. Tie-in the partridge feather tips
3. wind the thread in direction of the eye. The feather tips should be spreading around the hook shank

4. Tie-in the cock hackle feather

5. Finish winding the thread into the curvature of the hook

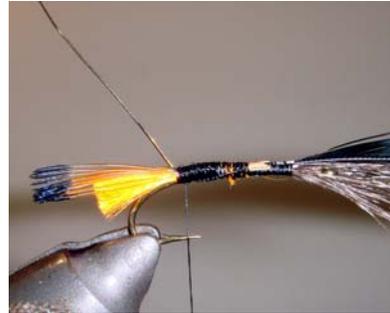

6. Tie-in the yellow floss as a tail

7. Cut the tail such that it just extends over the hook

8. Tie-in the goldpheasant feather tips on top of the floss tail

9. Tie-in the ribbing wire

10. Twist a small quantity of dubbing on the thread and wind one turn at the beginning of the tail

11. Tie-in a small amount of deerhair on top of the hook shank

12. Wind 2 turns with the dubbed thread

13. Tie-in again a small amount of deerhair on top of the hook shank

14. Wind 2 turns with the dubbed thread

15. Tie-in again a small amount of deerhair on top of the hook shank

16. Wind the ribbing wire through the wings to the tie-in point of the front wing

17. Wind 2 turns with the dubbed thread

18. Tie-in again a small amount of deerhair on top of the hook shank

19. Wind 2 turns with the cock hackle feather
 20. Clamp the feather in your hackle plier and let it hang in a waiting position
 21. Flip back the partridge feather tips

22. Wind another 2 turns with the cock hackle in front of the partridge feather tips

23. Wind the head
 24. Whipfinish
 25. Use black head cement to finish the fly
