

Paraloop Emerger

Materials:

Hook:	TMC 103BL 13-17
Thread:	14 black
Body:	Moosehair yellow & orange
Wing:	Glowbrite fluo yellow
Paraloop:	Horsehair and black cock
Thorax:	Flott'dub black

1. Tie-in the thread and wind it in close turns to the beginning of the curvature of the hook

2. Tie-in the two strands of Moose hair (by the tips)

3. Wind thread to the eye of the hook

4. Wind the body of the fly with the Moose hair

5. Tie-in the horse hair at the eye of the hook and secure it to approx. 1/3 of the shank

6. Tie-in the glowbrite and fix it with 2 turns around the horse hair

7. Tie-in the cock feather

8. Wind 2 turns with the cock feather around the glowbrite and the horse hair
9. Then wind the feather around the horse hair upwards for a distance equal to the shank length
10. Then wind the feather back to the hook shank

11. secure the feather by windind 2-3 turns around the horse hair just above the hook shank
12. Trim the glowbrite wing

13. Pull the cock feather tips backwards direction of the curvature of the hook

14. Twist the dubbing on the tying thread
15. Wind the thorax of the fly

16. Flip the horse hair to the eye of the hook
17. Fix the horse hair with 2-3 loose turns of the tying thread

18. Pull on the free end of the horse hair until the feathertips arrive at the tie-in point
19. Secure the horse hair with several windings

20. Wind head
21. Whipfinish
22. Secure the head with head cement
