

CDC Parachute

Materials:

Hook:	TMC100 10-18 Kamasan B400 10-18
Thread:	Black 8/0 or finer
Body:	Olive CDC feather
Parachute:	White CDC & Dark grey CDC

- 1 Tie in the thread at the eye of the hook
- 2 Wind the thread in close turns to the beginning of the curvature of the hook
- 3 Wind the thread back for a few turns

- 4 Tie in the olive CDC feather with a loose turn of tying thread
- 5 Wind a few loose turns of tying thread to the beginning of the hook bend

- 6 Pull the CDC feather backwards into the tunnel formed with the previous windings
- 7 Secure the position with 2 tight turns of tying thread
- 8 Wind the thread in direction of the eye of the hook

- 9 Wind the rear part of the body with the CDC feather twisting the feather after each turn to create a tapered body
- 10 Secure the feather

11 Cut off the excess of the feather
12 Trim off all free fiber tips

13 Split the thread and insert a bunch of white CDC feather tips and a bunch of dark grey CDC feather tips in the split thread
14 Twist your bobbin to secure the feather tips in the thread

15 Wind the post of the fly pulling the white feather tips upwards after each turn

16 Wind the parachute with dark grey feather tips by winding them around the post above the hook shank. Each successive turn has to be made below the previous one

17 Wind the head of the fly

18 Whipfinish

19 Trim parachute post and parachute feather tips to the correct length
