Hook:	TMC100 10-12 Kamasan B400 10-12
Thread:	Black 6/0
Head:	Yellow foam
Antennas:	Pheasant tail
Body:	Coffee bean
Legs:	Fine black rubber legs
Plus:	Red acrylic paint Black permanent marker UV glue

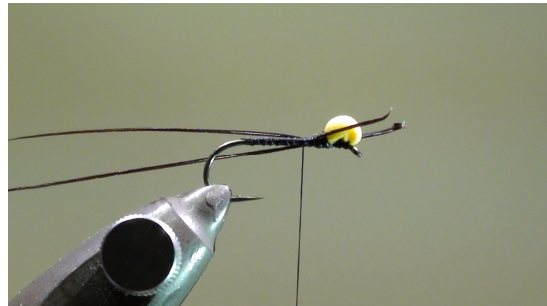

- 1 Tie in the thread at the eye of the hook
- 2 Wind it in close turns to the curvature of the hook and back

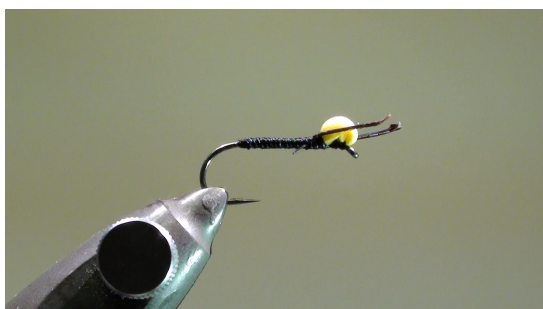

- 3 Tie in the foam strip at the eye of the hook

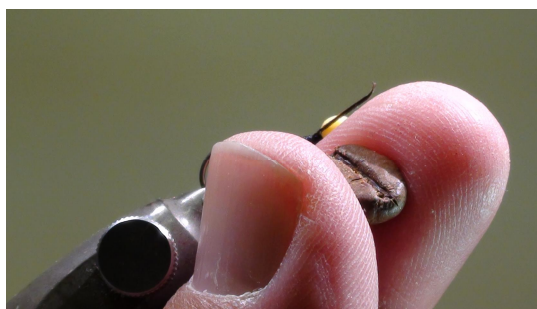

- 4 Flip the foam strip backwards
- 5 Tie it off
- 6 Tear off or cut off the excess

- 7 Tie in a pheasant tail fibre on each side of the head as an antenna

- 8 Wind the thread in close turns to the curvature of the hook and back
9 Whipfinish

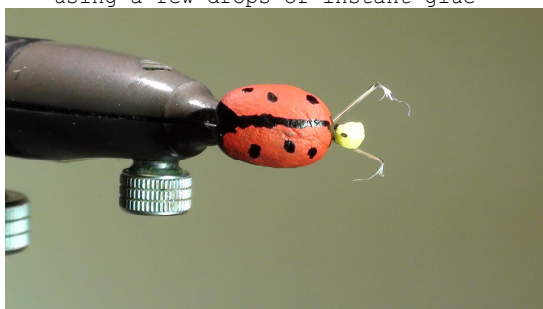

- 10 Using a saw blade or a file enlarge the slit of the coffee bean

- 11 Fix the coffee bean on the hook shank using a few drops of instant glue

- 12 Colour the upper side of the coffee bean with red acrylic paint

- 13 When the paint is dry, draw the contours of the wing case and apply a few black dots on the wing case using a permanent marker

- 14 Cover the back of the fly with UV glue.

- 15 Cure the glue with your UV torch

- 16 Cover the underside of the body with UV glue

- 17 Lay 3 rubber legs into the glue

- 18 Cure the glue with your UV torch

- 19 Trim the legs to the desired length
