

## Collie Dog Tube Fly

Materials:

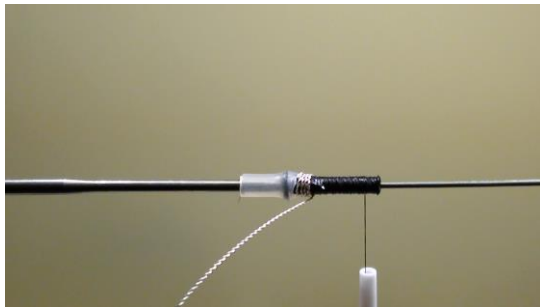

Tube:	Small or XSmall 12mm long
Thread:	Black 8/0
Tag:	Twisted silver wire
Body:	Silver Mylar
Ribbing:	Twisted silver wire
Wing:	Arctic fox black
Throat:	Red cock fiber tips

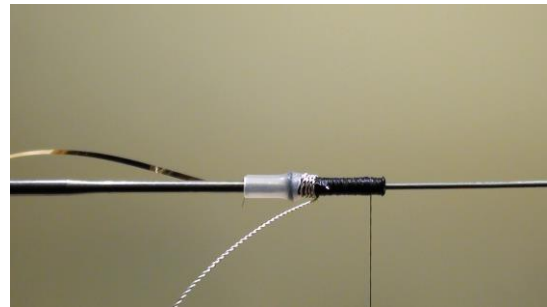

- 1 Slide the tube with the Silicone hook holder tube onto your tube needle
- 2 Tie in the thread on the front part of the tube
- 3 Wind it in close turns backwards to the silicone tube

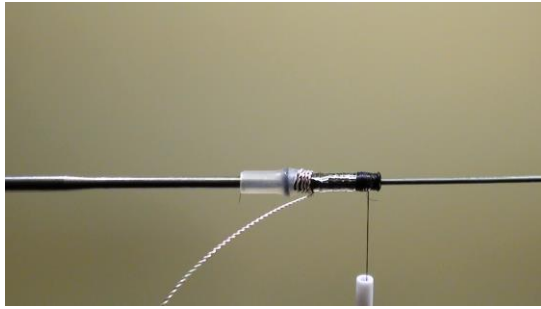

- 4 Tie in the twisted silver wire

- 5 Wind the tag with a few turns of the twisted silver wire
- 6 Tie off the wire with a few turns of tying thread
- 7 Wind the thread to the front of the tube

- 8 Tie in the silver Mylar at the front of the tube (if using 2 colored Mylar, tie it in with the silver side facing the tube)

- 9 Wind the Mylar backwards to the Tag  
10 Then wind it again forward to the front of the tube  
11 Tie off the Mylar film

- 12 Wind the twisted wire as a ribbing to the front of the tube  
13 Tie it off

- 14 Tie in a bunch of artic fox hair (2 to 2.5 times the length of the tube) as a wing

- 15 Tie in a bunch of red cock feather fiber tips as a throat (approximately the length of the tube)

- 16 Wind the head of the fly  
17 Whipfinish and/or instant glue

- 18 Apply a drop of black head cement on the head
